Welcome to the Wiki of IEEE's Smart Village (ISV) Committee. See our official website here: https://smartvillage.ieee.org/. This is a site that is in development using DokuWiki, and growing somewhat organically inspired by other wiki sites, such as the OpenStreetMap Wiki. It is currently hosted by adam.r.sauer@ieee.org, of the ISV Technology Committee, so feel free to register an account, get in contact with him or somebody else on our team, and figure out spots to plug in. Please review syntax and start contributing under IEEEGuidelines, and see the Wiki Playground page for ideas on wiki functionalities. Feel free to create new pages in that :playground header to get started in page editing.

Introduction

ISV is a collection of Electrical Engineers, Entrepreneurs, Community Leaders, and other related individuals working together to facilitate the development, deployment, and continued operation of Renewable Energy systems in disadvantaged communities around the world. For a further breakdown of the organization (mission, vision, history, and structure of the ISV program), see this page created from ISV's Marketing Team: InformationDigest.

Initiatives

ISV has supported over ___ initiatives deployed throughout the world, which can be seen on our interactive Projects Map. See the Projects Template for an outline of how we are thinking about featuring initiatives. For a deeper dive into these initiatives, see our Initiatives wiki page.

Project Development Process

The Regional Working Groups handle most of the projects for their region, and the PDC assists in diving deeper to assist in a subset of those projects.
